Subject: Tree Inventory Report for the Queen of the Valley Hospital Medical Office Building; Parking Structure; and Emergency Department/Intensive Care Unit Project (Precise Plan No. 20-04), West Covina, California

Dear Mr. Blakely:

Psomas is pleased to provide this tree inventory report for the Queen of Valley Hospital Project site located at 1115 South Sunset Avenue in West Covina, California (Exhibit 1). The purpose of the tree inventory is to document all trees on the Project site and specifically identify all trees that are subject to regulation by the City of West Covina (City) to support the environmental assessment of the proposed Project.

PROJECT DESCRIPTION

The proposed Project involves the construction of a two-story medical office building (MOB) adjacent to the existing Queen of the Valley Hospital. The new medical office building would be to the northeast of the existing main building and surrounded by landscaping. The new four-level parking structure will contain 398 parking spaces and would be constructed northwest of the existing main building, adjacent to the new MOB and separated by a landscaped area. Surface parking spaces are also provided outside the structure adjacent to the entrance and along the north and west elevations. Landscaping and a walkway separate the parking structure from the medical office building.

Additionally, a new two-story emergency department and intensive care unit (ED/ICU) would be constructed to the southwest of the existing Education Annex and to the west of the main hospital building. A total of 235 on-site parking spaces would be associated with these buildings. Adjacent to the MOB entry/exit would be a patient drop-off area and eight ambulance parking spaces. There would be landscaping along the entrance and patient drop-off area and within the surface parking lot.

REGULATORY AUTHORITY

The tree inventory summarized herein documents trees that are defined as “significant trees” or “heritage trees” in Division 9 of the City’s Municipal Code. These trees cannot be removed without first acquiring a tree permit from the City.

Significant trees are defined as any tree in the front yard of a parcel (or street-side yard of a corner lot) with a trunk diameter measuring at least 12 inches or trees located anywhere on a lot whose trunk measures at least 6 inches for the following species: any oak tree species

(*Quercus* spp.) that is native to California, California sycamore (*Platanus racemosa*), or American sycamore (*Platanus occidentalis*). The trees listed in this report are those that meet the size and/or species requirements to be considered as significant trees though the City's Municipal Code does not specify if the definition of significant trees applies to commercial properties. The significant tree definition does not indicate how to calculate the trunk diameter of multi-trunk trees. Therefore, trees that have a cumulative trunk diameter of 12 inches are included in this inventory.

Heritage trees are any individual tree or group of trees that have been identified by resolution of the Planning Commission based on: (1) association with a historic place, building, natural feature, or event; (2) identification on any historic or cultural resources survey as a significant feature of a landmark, historic site, or historic district; (3) its value as being representative of a significant period of the City's development; or (4) designation for protection or conservation in a specific plan, conditional use permit, precise plan of design, tract or parcel map, or similar development approval.

All street trees adjacent to the Project site were also evaluated and are included in this inventory report.

METHODS

Psomas Certified Arborist Trevor Bristle (International Society of Arboriculture Certificate No. WE-10233A) visited the Project site on August 24 and 31, 2020 to document the type, quantity, and condition of trees on the Project site. Each tree was individually numbered, and the trunk, branches, and foliage were carefully examined. During the site visit, the following data were recorded: tree species, trunk diameter at breast height (dbh), and canopy diameter. The health and aesthetic quality of each tree was assessed on a scale of 1 (very poor) to 5 (excellent).

The health evaluation generally considered visual evidence of vigor, such as the amount of foliage; leaf color and size; presence of branch or twig dieback; severity of insect infestation; the presence of disease; heart rot; fire damage; mechanical damage; amount of new growth; appearance of bark; and rate of callous development over wounds. Structural integrity was also evaluated with respect to branch attachment, branch placement, root health, and stability. Tree aesthetics were evaluated with respect to overall form and symmetry, crown balance, branching pattern, and broken branches.

EXISTING CONDITIONS

The survey area for this report consists of landscaped areas associated with the various buildings on the property and adjacent surface parking lots. Many of the trees in the survey area are planted amidst the parking lots and line the outer boundary of the property. As stated above, this tree inventory identifies all trees that meet the definition of "significant trees", though the City's Municipal Code does not state if this definition also applies to commercial properties. In all, the site inventory identified 272 trees in the survey area consisting of: 1 African fern pine (*Afrocarpus falcatus*), 1 crimson bottlebrush (*Callistemon citrinus*), 1 Deodar cedar (*Cedrus deodara*), 2 silk floss trees (*Chorisia speciosa*), 17 camphor trees (*Cinnamomum camphora*), 16 carrotwoods (*Cupaniopsis anacardioides*), 6 South African coral trees (*Erythrina caffra*), 2 Nichol's willowleafed peppermint (*Eucalyptus nicholii*), 1 common fig (*Ficus carica*), 1 rubber tree (*Ficus elastica*), 1 Indian laurel fig (*Ficus microcarpa*), 2 rusty-leaf figs (*Ficus rubiginosa*), 67 Shamel ash trees (*Fraxinus uhdei*), 1 maidenhair tree (*Ginkgo biloba*), 2 Arizona cypress (*Hesperocyparis arizonica*), 15 jacarandas (*Jacaranda mimosifolia*), 1 goldenrain tree (*Koelreuteria paniculata*), 18 crape myrtles (*Lagerstroemia indica*), 4 glossy privets (*Ligustrum lucidum*), 35 sweetgums (*Liquidambar styraciflua*), 1 tulip tree (*Liriodendron tulipifera*), 12 southern magnolias (*Magnolia grandiflora*), 1 saucer magnolia (*Magnolia x soulangeana*), 10 mulberry trees (*Morus alba*), 1 olive (*Olea europaea*), 1 Canary Island date palm (*Phoenix canariensis*), 4 Canary Island pines (*Pinus canariensis*), 1 Chinese pistache (*Pistacia chinensis*), 1 Catalina cherry (*Prunus ilicifolia* ssp. *Lyonii*), 17

Mr. Tony Blakely

 Page 3

evergreen pears (*Pyrus kawakamii*), 4 holly oak (*Quercus ilex*), 1 black locust (*Robinia pseudoacacia*), 6 Brazilian pepper trees (*Schinus terebinthifolius*), 11 coast redwoods (*Sequoia sempervirens*), 1 California fan palm (*Washingtonia filifera*), and 6 Mexican fan palms (*Washingtonia robusta*).

Trees in the survey area are generally well maintained and in good health without significant health problems. A significant exception is tree number 38; this American sweetgum is dead and should be removed as soon as possible because its location next to a bus stop makes this tree a hazard.

The locations of the trees described above are provided on Exhibit 2. A complete summary of the collected tree data during the field evaluation is provided in Attachment A.

EXPECTED TREE IMPACTS

The three Project construction components are indicated on Exhibit 2 and include: the MOB, the new Parking Structure, and the ED/ICU. Expected tree impacts that would result from Project implementation are summarized in Table 1 and are categorized by the Project components. All trees listed in Table 1 meet the definition of significant trees, assuming the definition applies to both residential and commercial property. In all, a total of 70 significant trees are expected to be removed for Project construction, consisting of 23 tree removals for the MOB, 29 removals for the new Parking Structure, and 18 removals for the ED/ICU. None of the trees on the Project site are considered heritage trees.

**TABLE 1
 SUMMARY OF PROPOSED TREE REMOVALS**

Tree Species		Quantity to be Removed	Range of Trunk DBH (inches)*
Scientific Name	Common Name		
Medical Office Building Area			
<i>Cupaniopsis anacardioides</i>	carrotwood	4	13.6 – 15.4
<i>Ficus elastica</i>	rubber tree	1	31.7
<i>Fraxinus uhdei</i>	Shamel ash	2	29.0 – 40.4
<i>Liquidambar styraciflua</i>	sweetgum	6	12.0 – 31.9
<i>Liriodendron tulipifera</i>	tulip tree	1	18.1
<i>Magnolia grandiflora</i>	southern magnolia	7	13.0 – 32.1
<i>Pyrus kawakamii</i>	evergreen pear	2	18.8 – 26.4
	Subtotal	23	
Parking Structure Area			
<i>Cinnamomum camphora</i>	camphor	6	12.5 – 21.2
<i>Erythrina caffra</i>	South African coral tree	4	23.0 – 41.4
<i>Fraxinus uhdei</i>	Shamel ash	15	12.1 – 19.5
<i>Sequoia sempervirens</i>	coast redwood	4	15.8 – 21.0
	Subtotal	29	
Emergency Department/Intensive Care Unit			
<i>Afrocarpus falcatus</i>	African fern pine	1	14.3
<i>Cinnamomum camphora</i>	camphor	2	15.5 – 19.2
<i>Erythrina caffra</i>	South African coral tree	1	31.9
<i>Lagerstroemia indica</i>	crape myrtle	5	8.7 – 12.6
<i>Liquidambar styraciflua</i>	sweetgum	6	12.0 – 18.6
<i>Magnolia grandiflora</i>	southern magnolia	2	12.0 – 15.5

**TABLE 1
 SUMMARY OF PROPOSED TREE REMOVALS**

Tree Species		Quantity to be Removed	Range of Trunk DBH (inches)*
Scientific Name	Common Name		
<i>Sequoia sempervirens</i>	coast redwood	1	26.6
	Subtotal	18	
Outside Project Areas/No Impact			
<i>Callistemon citrinus</i>	crimson bottlebrush	1	12.4
<i>Cedrus deodara</i>	Deodar cedar	1	32.9
<i>Chorisia speciosa</i>	silk floss tree	2	17.9 – 27.0
<i>Cinnamomum camphora</i>	camphor	9	12.2 – 26.5
<i>Cupaniopsis anacardioides</i>	carrotwood	12	12.0 – 17.9
<i>Erythrina caffra</i>	South African coral tree	1	23.4
<i>Eucalyptus nicholii</i>	Nichol's willowleafed peppermint	2	22.3 – 24.6
<i>Ficus carica</i>	common fig	1	17.8
<i>Ficus microcarpa</i>	Indian laurel fig	1	21.5
<i>Ficus rubiginosa</i>	rusty-leaf fig	2	13.0 – 22.5
<i>Fraxinus uhdei</i>	Shamel ash	50	10.4 – 38.5
<i>Ginkgo biloba</i>	maidenhair tree	1	23.7
<i>Hesperocyparis arizonica</i>	Arizona cypress	2	14.0 – 15.6
<i>Jacaranda mimosifolia</i>	jacaranda	15	14.4 – 21.6
<i>Koelreuteria paniculata</i>	goldenrain tree	1	12.7
<i>Lagerstroemia indica</i>	crape myrtle	13	12.4 – 19.1
<i>Ligustrum lucidum</i>	glossy privet	4	14.4 – 32.1
<i>Liquidambar styraciflua</i>	sweetgum	23	12.0 – 26.3
<i>Magnolia grandiflora</i>	southern magnolia	3	12.3 – 18.1
<i>Magnolia x soulangeana</i>	saucer magnolia	1	14.8
<i>Morus alba</i>	mulberry	10	16.5 – 21.0
<i>Olea europaea</i>	olive	1	52.0
<i>Phoenix canariensis</i>	Canary Island date palm	1	47.0
<i>Pinus canariensis</i>	Canary Island pine	4	17.2 – 24.1
<i>Pistacia chinensis</i>	Chinese pistache	1	13.9
<i>Prunus ilicifolia</i> ssp. <i>Lyonii</i>	Catalina cherry	1	13.3
<i>Pyrus kawakamii</i>	evergreen pear	15	12.1 – 18.1
<i>Quercus ilex</i>	holly oak	4	12.8 – 18.0
<i>Robinia pseudoacacia</i>	black locust	1	21.9
<i>Schinus terebinthifolius</i>	Brazilian pepper	6	10.0 – 25.6
<i>Sequoia sempervirens</i>	coast redwood	6	12.8 – 24.1
<i>Washingtonia filifera</i>	California fan palm	1	14.5
<i>Washingtonia robusta</i>	Mexican fan palm	6	10.0 – 14.5
	Subtotal	202	
	Total	272	
DBH: diameter at breast height			
*The DBH for trees that are multi-trunk trees are represented as the sum of the largest two trunks.
